Muhammad Wajahat

Cybersecurity Penetration Tester | Offensive & Defensive Security | Purple Teaming

Pakistan • github.com/Wajahat883 • linkedin.com/in/muhammad-wajahat-8292092b7

PROFESSIONAL SUMMARY

Cybersecurity professional working across offensive and defensive security, with a focus on penetration testing, vulnerability assessment, security monitoring, threat hunting and security investigations. Combines understanding of how systems are attacked with learning how to detect, investigate and strengthen defenses — a Purple Team approach. Background of ~1.5 years in software development provides a practical understanding of how modern web applications are built and deployed.

PROFESSIONAL EXPERIENCE

Cybersecurity Penetration Tester

Comrex Private Limited, Islamabad, Pakistan | 2025 – Present

- Conduct authorized penetration tests on web applications and APIs.
- Perform web application and API security assessments and vulnerability identification.
- Assess authentication, session management and access-control weaknesses.
- Document findings with clear, prioritized remediation guidance for developers.

Software Developer (Frontend)

Comrex Private Limited, Islamabad, Pakistan | June 2024 – 2025 (~1.5 years)

- Built responsive, component-based user interfaces for production web applications.
- Worked with modern JavaScript frameworks and REST APIs across the frontend stack.
- Collaborated on application architecture, state management and performance.
- Applied secure-by-default frontend practices informed by OWASP web security principles.

TECHNICAL SKILLS

Offensive Security: Penetration Testing, Web Application Security, Burp Suite, Nmap, Metasploit, OWASP Top 10, API Security, Reconnaissance, Vulnerability Assessment

Defensive Security: SOC Operations, SIEM, Splunk, Elastic, Sysmon, Windows Event Logs, Threat Hunting, MITRE ATT&CK, Detection Engineering, Incident Investigation

Purple Team (developing): Adversary Emulation, Attack Simulation, Detection Validation, ATT&CK Mapping, Detection Gap Analysis, Security Control Validation

Networking & Systems: TCP/IP, DNS, HTTP/HTTPS, Wireshark, Linux, Kali Linux, Windows

CERTIFICATIONS & TRAINING

- IBM Cybersecurity Certificate — IBM
- Introduction to Ethical Hacking Principles — Coursera
- Introduction to Networks — Cisco Networking Academy
- Pentesting Principles — TryHackMe
- Introduction to Pentesting — TryHackMe
- Certified Defensive Security Analyst (CDSA) — Hack The Box (Currently Learning — Not Yet Certified)

AWARDS & PROGRAMS

- eHunar Scholarship Program — selected into the scholarship / training program.

PROJECTS

Bug Finder Pro (In Development)

Security tool for URL/web app security scanning, AI-assisted finding triage, CVSS-based prioritization and report generation. Next.js, React, Node.js, MongoDB, Docker, AI API. github.com/Wajahat883/Bug-Finder

Tasklytics — Web App Security Assessment (Completed)
Authorized assessment of a SaaS app (Next.js, API routes, MongoDB, JWT). Mapped the API surface, reviewed auth/session flows and documented findings (Burp Suite, OWASP Top 10).

CyberLearn AI (Concept)
AI learning platform that transforms technical material into structured lessons, diagrams and slides. React, Node.js, MongoDB, OpenRouter API. github.com/Wajahat883/Cyber_Learn

HTB Defensive Security Investigations (Ongoing)
Hands-on detection and investigation on Hack The Box using Splunk, Elastic, Windows events and Sysmon; activity mapped to MITRE ATT&CK.

EDUCATION

Bachelor of Science in Computer Science (BSCS)
Virtual University of Pakistan | In Progress — 4 semesters completed | Expected graduation: 2028
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Computer Networks, Software Engineering, Web Engineering.

HANDS-ON LABS

Offensive (completed): Web Application Penetration Testing, Network Reconnaissance, Vulnerability Assessment, Authentication & API Security Testing, OWASP Top 10 practical labs.
Defensive (completed): SOC Investigations, Splunk SIEM queries, Windows Event Log analysis, Sysmon investigations, Threat Hunting with Elastic, suspicious process & network analysis.
Purple Team (in progress): MITRE ATT&CK mapping, attack simulation & detection validation, detection gap analysis, security control validation.
